

# Fork Extensions - Heavy Duty

When a longer reach or extra load stability is required, then forklift fork extensions offer the perfect temporary solution

Manufactured from durable 6mm thick steel, these heavy duty forklift fork extensions have been value engineered to offer a design at the lowest cost whilst achieving performance, quality, reliability, and safety

A folded channel design to the underside, which offers additional strengthening properties also provides a means to ensure the fork extensions do not 'ride up' the back of the fork, which otherwise can potentially occur if used with 'long drop' forks.

Model Ref	To Suit Max Fork Section (mm)	Fork Extension Length (mm)	SWL @ Load Centre	Weight (kg)
<b>EFEX-100-1800</b>	100 x 50	1800	3000kg @ 500mm	38
<b>EFEX-100-2000</b>	100 x 50	2000	3400kg @ 500mm	44
<b>EFEX-125-1800</b>	125 x 50	1800	3400kg @ 500mm	46
<b>EFEX-125-2000</b>	125 x 50	2000	3400kg @ 500mm	54

**Please Note:** Fork extension length should not exceed existing fork length by more than 66%

## Features & Benefits

- Value engineered from durable 6mm thick steel for maximum longevity
- Pressed folded channel design to the underside offers additional strengthening properties
- Plated underside prevents the fork extensions from 'riding up' the back of the forks
- Rounded tip profile for easy entry into and out of loads or pallets
- Removable heel pin offers 'drive in' entry, negating the need for manual handling whilst complying with manual handling regulations
- 'CE' marked and supplied with Certificate of Conformity to comply with Health & Safety Regulations
